

Megapixel HD-SDI Outdoor Bullet IR Camera

CLEBO-HD AB-2316IR

ABOUT MANUAL

Before installing and using the camera, please read this manual carefully.
Be sure to keep it handy for future reference.

PRECAUTIONS

- Do not open or modify.
- Do not open the case except during maintenance and installation, for it may be dangerous and can cause damages.
- Do not put objects into the unit.
- Keep metal objects and flammable substances from entering the camera. It can cause fire, short-circuits, or other damages.
- Be careful when handling the unit.
- To prevent damages, do not drop the camera or subject it to shock or vibration.
- Do not install near electric or magnetic fields.
- Protect from humidity and dust.
- Protect from high temperature.
- Be careful when installing near the ceiling of kitchen or a boiler room, as the temperature may rise to high levels.
- Cleaning :
To remove dirt from the case, moisten a soft cloth with a soft detergent solution and wipe.
- Mounting Surface :
The material of the mounting surface must be strong enough to support the camera.

FCC COMPLIANCE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference. When the equipment is operated in a residential environment. This equipment generates, uses, and radiates radio frequency energy; and if it is not installed and used in accordance with the instruction manual, it may cause harmful interference to radio communications.

WARNING : Changes or modifications are not expressly approved by the manufacturer.

FEATURES*

- Sony 1/2.8" CMOS Sensor
- Highest Resolution 2.1 Megapixels
- 720P / 1080P Mode selectable
- 100ft IR Distance
- Double Shutter WDR (Wide Dynamic Range) at 15fps Settings
- True Day and Night
- AGC / BLC / AWB
- 3D DNR (3D Digital Noise Reduction)
- D-Zoom (1~112 level)
- HL Mask (High Light Masking)
- Mirror Image Control
- Programmable Privacy Zone (24) & Motion Detection
- White defecet cancellation (DEFECT DET)
- 12VDC Support Only
- Secondary Video-BNC Output

3. Four(4) Screw and Four(4) Dry Wall Anchors
4. 2nd Video Jack
5. Tool
6. L-Wrench

SURFACE MOUNT INSTALLATION *

- ① Use the 4 mounting screws to install the camera on the wall or ceiling.

Then, follow the next step on the pages 9-12.

*Installation Using a Junction Box

*Note: Electrical junction box and required screws sold separately.

CONNECTING TO MONITOR*

Power DC12V

Video - BNC

HDMI CONVERTER

HDMI MONITOR

HD-SDI MONITOR

CONTROL BOARD & ADJUSTING LENS*

- 1 Remove clear plastic ring from the control cap.
- 2 Turn control cap counter-clockwise until cap separates completely from the camera body.

Adjusting Auto Focus Lens

If pushing the OSD joystick to 'UP', the lens will start zoom-in.

If pushing the OSD joystick to 'DOWN', the lens will start zoom-out.

If you keep pushing the joystick, zoom in/out will be continuously operated. When you find the right angle, take off your finger from the joystick and wait. The focus will be automatically adjusted.

CAMERA SETTING ANGLE*

CAUTION :

- ❶ Do not rotate more than 360°.
- ❷ Do not unnecessarily twist too many times.

RETURN	

DISPLAY

NONE, ID, TITLE

You can select whether displaying Camera ID and TITLE or not.

PROTOCOL

PELCO-D, NADATEL

If using Nadatel HD-SDI DVR, select the protocol NADATEL.

BAUDRATE

9600,2400bps

9600 is the default. There are 2 choices - 9600 and 2400bps.

RETURN

EXPOSURE

2 EXPOSURE

BRIGHTNESS ||||| 10
SHUTTER AUTO
DSS OFF
AGC ||||| 20
RETURN

BRIGHTNESS

0~20

You can adjust the brightness.
Higher number means brighter images.
The default is 10.

SHUTTER

AUTO

It's a default. Shutter speed is adjusted properly.

MANUAL

Shutter speed is selectable from 1/30 ~ 1/60000 but it's related to the menu LENS-MODE.

SHUTTER

LEVEL 1/30
RETURN

If LENS MODE is OUTDOOR, shutter speed is adjustable from 1/30~1/60000.
If LENS MODE is INDOOR/FLK, shutter speed is fixed with 1/30.
If LENS MODE is DEBLUR120, shutter speed is adjustable from 1/30~1/120.
If LENS MODE is DEBLUR240, shutter speed is adjustable from 1/30~240.

DSS (Digital Slow Shutter)

OFF, x2, x3, x4

The default is OFF.
If better sensitivity is required, choose x2,3,or 4.

AGC (Auto Gain Control)

0~20

Auto Gain Control automatically adjusts the video gain to enhance picture brightness in low light conditions. The higher number means better sensitivity.
The default is 20.

If DC or Manual mode is selected, some menu can't be controlled - OPTIC ZOOM, FOCUS MODE, TIMER, TDN SYNC.

MODE

OUTDOOR
INDOOR/FLK
DEBLUR120
DEBLUR240

It offers full range of electric shutter speed from 1/30~1/60000.
It fixes shutter speed with 1/30. It can avoid color rolling problem.
It offers electric shutter speed from 1/30~1/120.
It offers electric shutter speed from 1/30~1/240.

Both DEBLUR120, DEBLUR240 helps to avoid motion blur at still image.

OPTIC ZOOM

Zoom Range is adjustable from Tele to Wide.

LENS

FOCUS MODE

AUTO

When using Auto Focus Lens, Focus can be adjusted automatically. Also, you can set-up the TIMER to repeat the automatic focusing after finishing the installation. TIMER is OFF and from 1 ~ 10min.

MANUAL

If you want to adjust the focus manually, select MANUAL mode. In this case, TIMER menu will be changed to FOCUSING and you can adjust the focus Far / Near.

RETURN 0~4

ZONE NO 30 different privacy masking zones are available.
ZONE OP Zone Display. ON/OFF
X-POS X-Position (0~57)
Y-POS Y-Position (0~31)
X-SIZ X-Size (0~60)
Y-SIZ Y-Size (0~34)
COLOR Privacy Masking Zone Color - CYN, GRN, MAG, RED,
BLU, BLK, WHT, YEL
TRANS Transparency (0~4)
Lower number means more transparent.

DNR

Digital Noise Reduction reduces the noise/distortion on the screen at night, allowing clear images in low light conditions. You can select OFF / LOW / MIDDLE / HIGH.

MOTION

OFF/ON

If selecting ON, define the following menu.

*** RESOLUTION

It's what size of motion area must be displayed on the monitor. Higher number means smaller size of marking for motion area.

*** SENSITIVITY

The motion is how sensitively detected. Higher number means less sensitive.

RETURN

MOTION

RESOLUTION ||||| 5
SENSITIVITY ||||| 5
RETURN

IMAGE

CHROMA

0~20 It's color chroma level 0~20. The default is 7.

SHARPNESS

0~10 It's to make the image sharper.
High number means sharper image. The default is 10.

MIRROR

ON/OFF OFF is the default.

FLIP

ON/OFF OFF is the default.

E-Edge

ON/OFF It's a function of edge enhancement.

HLMASK

OFF

It's to mask the high lux areas. OFF is the default.

ON

If ON is selected, you can adjust the masking level and color. Level is 0~10. It also has 8 different colors - BLK, WHT, YEL, CYN, GRN, MAG, RED, BLU

IMAGE

CONTRAST

NORMAL/ HIGH/ HIGHEST

You can adjust the contrast level - Normal, High, and Highest.

COLOR

COLOR 1,2,3

Color 1 is the default. If the color reproduction on the monitor is not satisfied, try other modes - Color 2 or 3.

There are total 3 different color display Color 1,2, and 3.

HUE CONTROL

R-GAIN

You can adjust the amount of Red color. Level is 50~180.

B-GAIN

You can adjust the amount of Blue color. Level is 50~180.

MAX-DR

OFF / ON

MAX Dynamic Range provides clear images even when strong backlighting is present. Select MAX-DR ON or OFF.

MODE

OFF / BLC / WDR

OFF

BLC - Back Light Compensation Mode
WDR - Wide Dynamic Range (15fps Only)

WDR_WGT

0~9

It's to set up the dynamic range.
The higher number means wider dynamic range.
The default is 5.

BLC OSD

OFF / ON

Backlight compensation prevents subjects in defined areas of the scene from appearing too dark when backlighting is present.
If ON is selected, BLC Zone size and location is adjustable.

BLC POS-X

0~20

It's to adjust BLC Horizontal Position.

BLC POS-Y

0~20

It's to adjust BLC Vertical Position.

BLC SIZ-X

0~20

It's to adjust BLC Horizontal Size.

BLC SIZ-Y

0~20

It's to adjust BLC Vertical Size.

720P MODE

60/50FPS 60/50FPS is also supported at 720P mode.
30/25FPS It's the default.

LANGUAGE

ENG/ GER/ CHN It provides 3 different language - English, Germany, China.

TROUBLESHOOTING

Before sending your camera for repair, check the following or contact one of our technical specialists.

No VIDEO

Check the coaxial cable and make sure it is connected properly.

Check the OSD menu setup of the camera.

Check the power supply and make sure the camera is at the proper voltage and current.

Out-of-Focus VIDEO

Check the clear dome cover and the lens for dirt or fingerprints. Use a soft cloth and gently clean.

Try to operate the autofocus functions on the page 11.
